

Inspector

People are at the centre of our brand. Every day we deliver on our brand promise to Cherish Customers, Deliver Flawlessly, and stay a Step Ahead. Our people look beyond the conventional and reach for the extraordinary to win outside the box.

UTS Consultants' reputation is built on providing comprehensive engineering solutions. Our philosophy is to engineer it once. Our quality workmanship ensures projects are completed on time and on budget.

Successful UTS employees:

- are Customer-centric – they understand and embrace the role of delivering exemplary customer service
- are Leaders – who lead by example through their actions and attitudes
- are Innovators - they look for opportunities to improve, do things differently, and add value for our customers and business
- Commit to Excellence - in all that they do

ABOUT THE ROLE

Reporting to Chief Inspector, the Inspector will be responsible to conduct field inspections, analysis and observations of telecom construction work in a specific geographical area with respect to the Bell Canada Inspection Contract.

ACCOUNTABILITIES

- Train and develop Junior Contract Inspector(s).
- Provide daily work instructions, task assignments, follow-up and support to Junior Contract Inspector(s).
- Preliminary visits to work-site prior to construction to confirm scope of work, and identify any job constraints or hazards.
- Complete inspection during construction phase.
- Final restoration inspection (including spring clean-up when applicable).
- Ensure projects are completed on time, control extra charges and monitor customer quality expectations.
- Perform job tracking to ensure accuracy of billing.
- Resolve variances and customer concerns in a timely and professional manner.
- Document in writing all modifications with the reasons for deviations, work stoppages, design changes, etc.
- Document daily production / progress and maintain a daily construction diary and provided to Bell Canada.
- Ensure the contractor has all necessary permits, permissions and consents prior to commencement of work.
- Complete red line mark-ups of corrections / changes directly on the work plans so as-construct plans can be produced.
- Coordinate work activities with Program Manager, Project Administrator, Junior Inspectors, Project Engineers, Municipal representatives, construction foreman and crews.
- Adhere to strict project budgets and client deliverable dates.
- Other activities as required.

QUALIFICATIONS

- Extensive knowledge of telecom construction / relocation work activities to be inspected (pole line, concrete pad, manhole, fibre cable, copper cable, cut over, direct buried or concrete encased conduit, directional bore conduit).
- Strong problem solving and troubleshooting skills.
- Must have a valid Ontario driver's license, clean driving abstract and willingness to travel.
- Ability to work well individually while being productive, personable, and get along with others is essential.
- Technology program graduate from an accredited educational institution.
- Working knowledge of Book 7 and Road Safety.
- Willing to work irregular hours, long hours, and in poor weather conditions as dictated by the project.
- Basic knowledge of Microsoft Office productivity software.

SUCCESS FACTORS

- Focused on needs of customer with customer service mindset. At all times.
- Skilled to read and interpret engineering work plans.
- Communicate effectively and estimate task durations to meet schedules; multi-task and adapt to changing priorities and deadlines.
- Strong command of the English language both spoken and written with ability to communicate effectively, both verbal and in writing.
- Ability to work in a high-performance environment, deal with customers in a professional manner, and willingness to travel primarily within Ontario as required for utility projects.
- The gift of strong interpersonal skills and able to clearly communicate with customer, internal project teams including project managers, survey, and engineering.
- Specific knowledge and understanding of Canadian industry codes including ESA 22/04 and CSA 22.3 No. 1-10.
- Knowledge of Bell Canada Standards and Practices for outside plant design and construction.
- Willingness to learn and train those in need.

COMPENSATION

- Competitive wage based on experience and knowledge.
- Defined Contribution Pension Plan with employer matching program.
- Employee voluntary RRSP contributions.
- Employer paid medical, prescription, dental and vision benefits.
- Employer paid basic life insurance.
- Employee voluntary auto and home group insurance.
